### Random Text Generator

In order to help get the same ad up on Craigslist that may be converting on Craigslist better than the other ads you can use the Random Text Generator as seen in webinar to make your 'duplicate' ad appear unique.

To access this free web-based tool:

<http://www.RandomTextGenerator.com>

SUPER TIP: You can also practice writing KEYWORD enriched paragraphs that you can use, too. This will definitely help your Craigslist Ad get indexed by Google and believe us it happens all the time! Great backlinks!

## **TRACKING AND REDIRECT TOOLS**

Testing and Tracking is truly the key to your marketing success. And you should never post an ad on Craigslist using a direct link. First, you don't really get a grasp of the traffic the link you have in a certain city is generating, heck, maybe that city is a 'dead' city with no traffic, well, you don't want to waste time posting in that city, do you?

By using a tracking and redirect tool you can easily keep track of the cities that are sending you the most traffic!

Take a look at the graph from my <http://www.Clickmeter.com> account. You can see that it lets me know my 'Unique Clicks', fake traffic (spider bots) and everything. Lets me know the days that have had most clicks! And though you don't see it in the graph in another section of Click Meter I can see the Top Cities that are driving me the most traffic!

You don't want to be a 'Gunslinger' marketer just hoping something sticks and works and converts. Take the time to track, test, and learn.

**Special Note:** <http://www.Budurl.com> is also a great tool that does the very same.

**SUPER TIP:** Be careful of 100% free tracking and redirect platforms. They tend to have server issues and problems and that means you may have ads up on Craigslist but the links aren't working.
